

WITH OVER
ONE MILLION

SHIPPED,
THIS BOX
MUST BE
MAGIC.

From corporations to factory floors to dot-coms, there are now a million IBM RS/6000® UNIX® systems out there. For good reason. Our IBM S80 is the number-one UNIX server in ten performance benchmarks, topping Sun, HP and Compaq on speed, file serving, transaction processing and Java® performance. Over 150,000 companies around the world, from Fortune 500 companies to net-gen companies like VoicePlanet.com, 2TheMart and Quik Internet, rely on IBM UNIX systems. It's no mystery how we sold as many high-end UNIX servers in three months as it took Sun 18 months to sell.* To learn how you can get more processing power than Sun's E10000 at roughly half the cost; log on to www.ibm.com/magicbox/unix

IBM @business servers. Technology. Innovation. Magic.

IBM, RS/6000 and the e-business logo are trademarks or registered trademarks of International Business Machines Corporation in the United States and/or other countries. UNIX is a registered trademark of The Open Group. Java is a trademark of Sun Microsystems, Inc. in the United States and other countries. All other product names may be trademarks of their respective owners. S80 performance claims are based on SPECintbase, SPECintbase_r, SPECintbase_r2, SPECintbase_r3 (see www.spc.org for details). TPC-C (see www.tpc.org for details), SAP F0 (see www.sap.com for details), SAP F0 (see www.sap.com for details), Lotus Notes (see www.lotus.com for details), Java (see www.java.com for details). All benchmark results are current as of 2/2000. See www.ibm.com/corporate/press/press0002 for more information. *Claim based on comparison between S80 and Sun's E10000 and E10000 units shipped in the first 18 months, according to IDC 2000 quarterly Server Tracker. Claim based on TPC-C results for S80 and E10000, current as of 2/2000 (see www.tpc.org for details). ©2000 IBM Corp. All rights reserved.
